

Auto Tankers

DESCRIPTION:

Production and installation of single and multi-sectional milk tanks, fit for installation on motor vehicles. Auto tanker can be one or several sections according to client and designed according to the chassis. Each section of the tank is equipped with a hatch with air vent, cylindrical washable head incoming pipeline for milk and pipeline cleaning solutions.

FEATURES:

The tanks are supplied with hatches, washing heads, cabinet with receiving station, self-suction pump and service ramp. The tanks are insulated by stainless lining that ensures 24 hour storage of the product in the event of motor vehicle breakdown. The tanks are designed depending on the motor vehicle frame.
