

Shelves

DESCRIPTION:

The shelves are intended for hard types of cheeses, such as yellow cheese, gouda, pecorino, etc., during the period of aging and storage.

The shelves may be used to put other food products on them as well, without package during their required technological rest, as well as packed during their storage.

The shelves' structure is made of stainless steel, while the surfaces are made of perforated plastic modules permitted for use in the food industry.

The plastic surface modules may be dismantled for washing and disinfection.

TECHNICAL FEATURES:

length:	1500; 2000 mm
With:	700; 1000 mm
Height:	2000 mm
Floors:	4 бр.
Distance between the floors:	530 mm
Dimensions of modules for panels:	500x330x30;500x500x30mm
